NORTH-EAST ZONAL SYMPOSIUM ON PHARMACOGENOMICS AND PERSONALIZED MEDICINE

ORGANIZED BY
DEPARTMENT OF PHARMACOLOGY
GAUHATI MEDICAL COLLEGE,
GUWAHATI-781032

SATURDAY, 16TH JUNE, 2018
08.00 A.M. – 04.00 P.M.

LANDMARK HOTEL,
NEAR NEHRU STADIUM,
DR. B. BOROOAH ROAD, ULUBARI
GUWAHATI-781007, ASSAM

BRIEF ABOUT THE SYMPOSIUM

The North-east India has the possibility to become a hotspot for population geneticists due to its unique, strategic geographic location and the presence of linguistically, culturally and demographically diverse populations. There is ample scope for Pharmacogenomic studies which can detect genetic variations in the population that can affect the Pharmacokinetics of drugs and Pharmacodynamic responses. With continued incorporation of Pharmacogenomics into Clinical Trials, important genes and polymorphisms can be identified and therapy can be modified accordingly. Pharmacogenomics bear special relevance to North-East India owing to its genetic diversity across population; research into which will open up vast scope for understanding population genomics and its application in personalized medicine, facilitating successful therapeutics. This symposium is going to be the first of its kind in the entire North-East and aims to motivate research into that direction. Eminent scientists/ Academicians from premier medical institutes and the pharmaceutical industries across the country will be present as guest speakers at the symposium.
